

Amendments

In the Specification:

Please amend the third paragraph on page 22 as follows:

Self antigen : As used herein, the tem “self antigen” refers to proteins encoded by the host’s DNA and products generated by proteins or RNA encoded by the host’s DNA are defined as self. In addition, proteins that result from a combination of two or several self-molecules or that represent a fraction of a self-molecule and proteins that have a high homology ~~two~~ to self-molecules as defined above (>95%) may also be considered self.
